

Need support with your student's tech? PSD can help

PSD technology staff are providing technology support for students, families, teachers and staff during this remote learning time. Teachers and staff have been given basic troubleshooting tips for technology issues that may come up while working with students.

If you still have questions after first working with your teacher or need additional assistance with a student district-issued laptop, please email covidtechhelp@psdschools.org. Please know that PSD technical staff are responding to many questions at this time. Thank you ahead of time for your patience.

Soon, families will be able to find additional technical support information on the [PSD Remote Learning for Students web page](#).
